           TELEPHONE: (708)470-6501

TELEPRAN: (708)470-6501

INFORMATION FOR SEQ ID NO. 317:
SEQUENCE CHARACTERISTICS:
LENGTH: 18 base pairs
TYPE: nucleic acid
STRANDEDNESS: single
TYPE: TOPOLOGY: linear
MOLECULE TYPE: DNA (synthetic)

Sequence 314, Application US/09216393B

Patent No. 6514694
GENERAL INFORMATION:
APPLICANT: Milhausen, Michael James
TITLE OF INVENTION: TOXOPLASMA GONDII PROTEINS, NUCLEIC ACID MOLECULES, AND USES THER
FILE REFERENCE: TX-1-C.
CURRENT APPLICATION NUMBER: 08/09/216,393B
PRIOR APPLICATION NUMBER: 08/994,825
PRIOR APPLICATION NUMBER: 08/994,825
PRIOR PILING DATE: 1997-12-19
NUMBER OF SEQ ID NOS: 366
SOFTWARE: Patentin Version 3.1
SEQ ID NO 314
LENGTH: 18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            GENERAL INFORMATION:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ઠ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         US-09-345-882-123/C
US-09-345-882-123/C
US-09-345-882-123/C
Sequence 123, Application US/09345882
Patent No. 6399373
GENERAL INFORMATION:
APPLICANT: BOUGUELET, Lydie
TITLE OF INVENTION: A NUCLEIC ACID ENCODING A RETINOBLASTOMA BINDING PROTEIN (RBP-7)
TITLE OF INVENTION: AND POLYMORPHIC MARKERS ASSOCIATED WITH SAID NUCLEIC ACID.
FILE REPREBERGE: GENERY. 031A
FILE REPREBERGE: GENERY. 031A
CURRENT PELLICATION NUMBER: US/09/345,882
CURRENT FILING DATE: 1999-06-30
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       .

Sequence 2017, Application US/08435628

Patent No. 5817708

Patent No. 5817708

APPLICANT: Stinchcomb, Dan T.

APPLICANT: Draper, Kenneth

APPLICANT: Draper, Kenneth

APPLICANT: Jarvis, Thale

ITLE OF INVENTION: METHODS AND COMPOSITIONS FOR

ITLE OF INVENTION: TREATMENT OF RESTENOSIS AND

ITLE OF SEQUENCES: 2627

NUMBER OF SEQUENCES: 2627
                                                                                                                                                                                                                                                                                                                                       ZIP: 90071
